OpenJS Foundation

Intellectual Property Policy

The OpenJS Foundation supports numerous individual projects (each, a "Project" and together, the "Projects"). All new inbound code contributions to individual Projects are made pursuant to the license applicable to each such Project (with respect to each Project, the "Project Code License").

The technical governing body of each Project is free to choose, as its Project Code License, any of the following licenses:

- The Apache License, Version 2.0 (available at http://www.apache.org/licenses/LICENSE-2.0)
- The MIT License (available at https://opensource.org/licenses/MIT),
- The 2-Clause BSD License (https://opensource.org/licenses/BSD-2-Clause), or
- The 3-Clause BSD License (available at https://opensource.org/licenses/BSD-3-Clause).

Alternatively, the technical governing Project may select an alternative open source license as the Project Code License with approval by the Board of Directors of the OpenJS Foundation (the "Board").

The OpenJS Foundation and its Projects may seek to integrate and contribute back to other open source projects ("Upstream Projects") within the scope of driving widespread adoption and continued development of key JavaScript solutions and related technologies. Based on this design goal for the OpenJS Foundation, the development community will:

- Conform to all license requirements of the Upstream Projects, including dependencies, leveraged by the Project; and
- Operate to maximize opportunities for compatibility with other projects that might be leveraged in the project.

If an alternative inbound or outbound license is required for compliance with the license for an Upstream Project or is otherwise required to achieve the OpenJS Foundation's, or an individual Project's, objectives, the Board may approve the use of an alternative license for inbound or outbound contributions on an exception basis. Please email info@openjsf.org to obtain exception approval.

Except as may be approved by the Board:

- All new code contributions to any Project shall be made under the Project Code License accompanied by a Developers Certificate of Origin (DCO, available at http://developercertificate.org/), which will bind the individual contributor and, if applicable, their employer to the Project Code License.

- All outbound code files will be made available under the Project Code License.

- All documentation, image, and audiovisual files (e.g., .txt., .rtf, .doc, .pdf, .jpg, .tif, .mp3, .wav, and some .html files) (including without limitation code that is intended as sample code if included in a documentation file) will be contributed to the Project and made available under one of the following licenses selected by the Project's technical governing body (the "Project Documentation License"):
    o Creative Commons Attribution 4.0 International License (CC BY 4.0) (available at http://creativecommons.org/licenses/by/4.0/), or
    o The MIT License (available at https://opensource.org/licenses/MIT).

Contributed files should contain license information, such as SPDX short form identifiers, indicating the open source license or licenses pertaining to the file.

Furthermore, on notice to the Projects, the Board may adopt and/or modify contribution policies for the contribution of code to any Project.

The technical governing body of each Project may provide for additional requirements with respect to contributions. For example, a Project may require that new code contributions to a Project be accompanied by an OpenJS Foundation CLA, available at https://cla.openjsf.org.

Except for (a) each member's commitment to be bound by this Policy, the applicable Project Code License(s), and the applicable Project Documentation License(s), in each case with respect to its or its employees' authorized contributions to any Project; and (b) any applicable contributor license agreement, if any, no license is granted by the member to its intellectual property, and none shall be implied by general membership in the OpenJS Foundation.

The current version of this IP policy can be found at https://ip-policy.openjsf.org.

As adopted by the Board of Directors on October 22, 2019
